PROFESSIONAL EXPERIANCE

- Production Support Engineer at Excellex Technology Pvt. Ltd., Mumbai
- Client: National Stock Exchange (NSE), BKC, Mumbai from June 2022 – Present
- Provided application support and troubleshooting for critical NSE applications, including E-IPO, CBRICS, EBP, and RFQ.
- Monitored system logs, managed incidents, and ensured system availability and reliability.
- Utilized Service Now for incident , problem , change management and ticketing, CONTROL-M for job scheduling, and ITRS for proactive monitoring.
- Coordinated with development and operations teams to resolve production issues, improve application performance, and support live trading environments.
- Certifications & Training: AWS and DevOps Training.
- **Projects & Accomplishments**

  • Corporate Bond Reporting and Clearing System (CBRICS): A Java-based platform for reporting, clearing, and settling corporate bond transactions. Enabled real-time transaction reporting for brokers and institutions, improving market transparency. Integrated a clearing mechanism, acting as a central counterparty to minimize counterparty risk.

  • Electronic Bidding Platform (EBP): Facilitated electronic bidding for debt securities, allowing issuers to raise capital through a secure and transparent process. Improved bidding transparency by displaying bids in real-time, ensuring competitive pricing and fair access for institutional investors.
